

I'm not robot!

Today, the 10 richest people in the world control \$1.2 trillion in wealth. This scale of wealth is equal to approximately 1.4% of the world economy. Amazon's entire market cap, or spending \$1 million a day for 3,000 years. In fact, it's almost double the amount seen two years ago (\$663 billion). As billionaire wealth accumulates at a remarkable speed, we feature a snapshot of the world's richest in 2022, based on data from the Forbes Real-Time Billionaires List. Top 10 Richest People in the World Elon Musk, with a fortune of \$203 billion, is the richest person on the planet. Despite supply chain bottlenecks, Tesla delivered a record number of vehicles globally in the first quarter of 2022. Musk, who is also CEO and chief engineer of SpaceX, plans to send the largest rocket ever built into orbit in 2022. It spans 119 meters tall. Here are the richest people in the world, based on data as of June 13, 2022: RankNameSourceNet Worth (June 2022) 1Elon MuskTesla, SpaceX\$203B\$151B\$52B 2Bernard Arnault & familyLVMH\$140B\$150B-\$10B 3Jeff BezosAmazon\$129B\$177B-\$48B 4Bill GatesMicrosoft\$121B\$124B-\$3B 5Warren BuffettBerkshire Hathaway\$102B\$96B\$6B 6Mukesh AmbaniDiversified\$99B\$85B\$14B 7Gautam Adani & familyInfrastructure, Commodities\$97B\$51B\$46B 8Larry PageGoogle\$92B\$92B\$0B 9Larry EllisonOracle\$89B\$93B-\$4B 10Sergey BrinGoogle\$89B\$89B\$0B With a net worth of \$129 billion, Jeff Bezos falls in third place. Since last March, Amazon shares have fallen almost 30% in light of weaker earnings and lagging retail performance. Most notably, Mark Zuckerberg, CEO of Meta (formerly Facebook) fell off the top 10 for the first time since 2016. Meta shares plunged after reporting the first-ever drop in global daily active users since 2004. Growth Rates of the Top 10 Overall Among the 10 richest people in the world, here's who saw their wealth rise the fastest: Gautam Adani saw his fortune rise more than any other in this top 10 list. Adani heads one of the three largest industrial conglomerates in India. In the coming years, Adani plans to invest \$70 billion in the renewable energy sector. Like Adani, Musk saw his wealth rise among the fastest, even as Tesla shares have declined over 40% since their peak in November. Crypto Billionaires in 2022 Even amid the crypto winter, at least ten people worldwide have seen their wealth climb into the billions thanks to the staterospheric rise of cryptocurrencies. Sam Bankman-Fried, founder of the FTX crypto derivatives exchange, is at the top, with a jaw-dropping \$21 billion net worth. Bankman-Fried launched the exchange in 2019 when he was 27. FTX now has one million users and a \$32 billion valuation. RankNameNet Worth Age (as of June 13) 1Sam Bankman-Fried\$21B\$20 2Chanpeng Zhao\$17B\$4 3Gary Wang\$6B\$29 4Song Chih-yung\$4B\$4 5Cameron Winklevoss\$4B\$4 5Tyler Winklevoss\$4B\$4 6Barry Silber\$3B\$4 7Chris Larsen\$3B\$7 8Mark Zuckerberg\$2.9B\$1 9Brian Armstrong\$2B\$39 10Follower Bankman-Fried is Changpeng Zhao, the co-founder of cryptocurrency exchange Binance. It is the largest exchange globally. Also on the list are co-founders of Gemini cryptocurrency exchange Coinbase and Tyler Winklevoss, each with a net worth of \$4 billion. Like Mark Zuckerberg, they have their sights on building a metaverse. Larger Shifts Will billionaire wealth continue to accumulate at record rates? As the invasion of Ukraine presses on, it will likely have broader structural outcomes. Some argue that war is a great leveler, a force that has reduced wealth inequality, as seen in the aftermath of WWII. Others suggest that it increases wealth divergence, especially when the war is financed by public debt. Often, costs have become inflated due to war, putting pressure on low and middle-income households. Whether or not the war will have lasting effects on wealth distribution is an open question, however, if the pandemic serves as any precedent, the effects will be far from predictable. In this infographic, we examine new data that ranks the top 25 countries by their default risk. In May 2022, the South Asian nation of Sri Lanka defaulted on its debt for the first time. The country's government was given a 30-day grace period to cover \$78 million in unpaid interest, but ultimately failed to pay. Not only does this impact Sri Lanka's economic future, but it also raises an important question: which other countries are at risk of default? To find out, we've used data from Bloomberg to rank the countries with the highest default risk. The Sovereign Debt Vulnerability Ranking Bloomberg's Sovereign Debt Vulnerability Ranking is a composite measure of a country's default risk. It's based on four underlying metrics: Government bond yields (the weighted-average yield of the country's dollar bonds) 5-year credit default swap (CDS) spread Interest expense as a percentage of GDP Government debt as a percentage of GDP To better understand this ranking, let's focus on Ukraine and El Salvador as examples. CountryRankGovernment Bond Yield (%5Y CDS SpreadInterest Expense (% of GDP)Government Debt (% of GDP) [] El Salvador131.8%3.376bps (33.76%)4.9%26.6% [] Ukraine860.4%10,856bps (100.85%)2.9%49% 1 basis point (bps) = 0.01% Why are Ukraine's Bond Yields so High? Ukraine has high default risk due to its ongoing conflict with Russia. To understand why, consider a scenario where Russia was to assume control of the country. If this happened, it's possible that Ukraine's existing debt obligations will never be repaid. That scenario has prompted a sell-off of Ukrainian government bonds, pushing their value down to nearly 30 cents on the dollar. This means that a bond with face value of \$100 could be purchased for \$30. Because yields move in the opposite direction of price, the average yield on these bonds has climbed to a very high 60.4%. As a point of comparison, the yield on a U.S. 10-year government bond is currently 2.9%. What is a CDS Spread? Credit default swaps (CDS) are a type of derivative (financial contract) that provides a lender with insurance in the event of a default. The seller of the CDS represents a third party between the lender (investors) and borrower (in this case, governments). In exchange for receiving coverage, the buyer of a CDS pays a fee known as the spread, which is expressed in basis points (bps). If a CDS has a spread of 300 bps (3%), this means that to insure \$100 in debt, the investor must pay \$3 per year. Applying this to Ukraine's 5-year CDS spread of 10,856 bps (108.56%), an investor would need to pay \$108.56 in exchange for to insure \$100 in debt. This suggests that the market has very little faith in Ukraine's ability to avoid default. Why is El Salvador Ranked Higher? Despite having lower values in the two metrics discussed above, El Salvador ranks higher than Ukraine because of its larger interest expense and total government debt. According to the data above, El Salvador has annual interest payments equal to 4.9% of its GDP, which is relatively high. Comparing to the U.S. once more, America's federal interest costs amounted to 1.6% of GDP in 2020. When totaled, El Salvador's outstanding debts are equal to 82.6% of GDP. This is considered high by historical standards, but today it's actually quite normal. The next date to watch will be January 2023, as this is when the country's \$800 million sovereign bond reaches maturity. Recent research suggests that if El Salvador were to default, it would experience significant, yet temporary, negative effects. Another Hot Topic for El Salvador: Bitcoin In September 2021, El Salvador became the first country in the world to adopt bitcoin as legal tender. This means that Bitcoin is recognized by law as a means to settle debts and other obligations. The International Monetary Fund (IMF) criticized this decision in early 2022, urging the country to revoke legal tender status. In hindsight, these warnings were wise, as Bitcoin's value has fallen by 56% year-to-date. While this isn't directly related to El Salvador's default risk, it does open potential avenues for relief. For instance, large players in the crypto space may be willing to assist the government to keep the concept of "nation-state bitcoin adoption" alive. This graphic compares the cost of living and purchasing power of 578 cities worldwide, using New York City as a benchmark for comparison. Creator Program The amount of money that's needed to pay for day-to-day expenses like housing and food varies greatly from city to city. And some cities, like New York City, are known as especially expensive places to live. So how do everyday expenses in New York City truly compare in costs to places like Beirut, Lebanon, or Bangalore, India? This graphic by Victor Dépre (hpyntc.data) uses 2022 data from Numbeo to compare the cost of living and purchasing power in 578 different cities around the world, using New York City as a benchmark for comparison. The Cost of Living Index Though New York City is widely recognized as one of the most expensive cities in the world, according to Numbeo—the world's largest database of user-contributed data on cities and countries—there are a number of cities that are actually more expensive than the Big Apple. Here's a look at the comparative cost of living in 578 cities. For context, if a city has a cost of living index of 121, that means day-to-day expenses in it are 21% higher than New York's, on average.
